OVERALL PERFORMANCE

Valley High Ventures Ltd. (the “Company”) was incorporated on August 11, 1980 under the laws of the Province of British Columbia. The Company is pursuing opportunities in the exploration of mineral and natural resource properties and is considered to be in the development stage.

The Company is a reporting issuer in British Columbia and Alberta and its shares are listed on the TSX Venture Exchange under the symbol VHV.

The Company is in the process of acquiring and exploring its mineral properties and has not yet determined whether the properties contain ore reserves that are economically recoverable. The recoverability of the amounts shown for mineral properties and related deferred exploration costs are dependent upon the existence of economically recoverable reserves, the ability of the Company to obtain necessary financing to complete the development of those reserves and upon future profitable production.

Mineral Properties

Yemen Properties

During fiscal 2004, pursuant to the acquisition of an exploration license that provided the Company with the rights to prospect for all minerals other than hydrocarbons in an area located in west central Yemen, the Company issued 200,000 common shares valued at \$48,000. The Company has agreed to pay a finder’s fee of 20,000 common shares.

In August of 2005, the Company agreed to renew the exploration license for a period of two years expiring August 2007. During the period ended January 31, 2006, the Company obtained a prospecting permit expiring August, 2006 and paid US\$25,000 pursuant to the prospecting permit and exploration license.

During the period ended October 31, 2006, the company started initial exploration on its Lloyd and Nordik properties. The properties adjoin and partly enclose Mt. Polley Mining Corporation's claims on which several new deposits have been located in recent years. Mt. Polley Mining Corporation is a wholly owned subsidiary of Imperial Metals Corp. The exploration consisting of 65 kilometers of induced polarization and magnetic surveys, is in part designed to examine known copper-gold mineralization at the Boundary Zone which was partly drilled in the past and straddles the common boundary between the Company's properties and Mt. Polley Mining Corporation's claims.

The Company added two mineral properties to its holdings around the Mount Polley Mine in the Cariboo.

The Buc Property consists of 235.906 hectares adjoining the company's Nordik claims. The property has been acquired by a one year option with payments of \$10,000 and 25,000 shares.

The Dome property covers 666.942 hectares and adjoins the company's October claims to the northwest. It was acquired under a four year option by payment of \$10,000 and 270,000 (40,000 paid) shares spread over four years. Previous work on the property was carried out by Dome Exploration (Canada) Ltd.

The company is in the process of establishing grid systems over the above properties and the adjoining Nordik and October claims in preparation for exploration consisting of geophysical surveys.
